

Name / organizations	Concerns/ Discussions
NHA LLDA	<ul style="list-style-type: none"> <li>• presence of informal settlers along the lakeshore areas pose a big challenge to WAVES. In fact, relocation/resettlement of around 68,000 families encroaching the lakeshore need to be considered</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>• Shoreland areas with informal settlers</li> <li>• Ano ang extent of private property within the shoreline area? Sino naggagawa ng property sa shoreland? All waters belong to the state, from the highest water line, sa state pa din yon!</li> <li>• I think this is one of the biggest problems in LdB, i.e., ownership of the shoreland. LGU ba, DENR o kanino ahensiya?</li> <li>• Lot of laws that are actually there but are not implemented</li> </ul>
Climate Change Commission	<ul style="list-style-type: none"> <li>• One of the strengths, presence of governing bodies but with conflicting mandates</li> </ul>
WWF	<ul style="list-style-type: none"> <li>• There are many laws and issuances enacted by different govt agency (EMB, LWUA, etc.). We recognize that they do not have adequate resources to enforce the law, that is why they are proposing to do partnership with LGUs to enforce law that are entrusted with govt agencies. Trust the LGUs to make things happen</li> <li>• Recognize that at the level of the LGUs, they run to the national agencies to implement the laws; it takes time and money to enforce the laws</li> </ul>
SIBCAFI	<ul style="list-style-type: none"> <li>• Strengths are Manpower, high competency, skillfull, innate mandate,</li> <li>• Weakness are enforcement of regulations, stakeholder engagement</li> <li>• Opportunity is that natural calamities forge partnership</li> </ul>
LGU-Binagonan	<ul style="list-style-type: none"> <li>• Enforcement of land use, solid waste, disaste preparedness</li> <li>• Strengths of LGUs-police power, manpower,</li> <li>• Weakness-lack of political will, LGUs' lack of funding, lack of directional policies from National Govt, katulad sa solid waste, bawal na ang dumpsite, nagdedevelop na kami ng landfill, dapat may directive sa National Govt.</li> </ul>

	<ul style="list-style-type: none"> <li>• Sa ngayon matagal na dapat nai-implement ang RA 9003 pero may narerepremand ba na LGU? May napepenalize ba na local chief executive/mayors, kung sa Binangonan wala kmi, pero sa Taytay, nasa daan ang tambak ng basura, may open dumpsite, meron batas pero namomonitor ba ng govt?</li> <li>• Kapag inutusan ng National Govt ang mga LGUs, wala magagawa LGUs kundi sumunod; kung wala instruction, di kikilos o gagalaw and LGUs</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>• Marami ginagawa LGUs, kaso Kulang sa education ang tao, mahirap alisin ang habit, kahit maya't-maya sabihan mo hindi pa din ginagawa... dapat continuous ang education, ito dapat kasama sa function ng LGU, education... kung pupunta ka lang duduguin ka lang, its hard to change people</li> <li>• Around LdB, we need strong education in protecting the Lake</li> </ul>
NHA	<ul style="list-style-type: none"> <li>• Relative to HLURB, there is lack of sanctions, kelangan kantihin, sa tigas ng ulo ng mga Pilipino, pagtatawanan lang tayo</li> </ul>
LLDA	<ul style="list-style-type: none"> <li>• May nakakapagpatupad ng CWA. LLDA implements the Public Disclosure Program that uses the power of media and information to commend or shame violators including LGUs, wherein environmental performance ng LGUs, binibigyan ng award ang kanilang mga good practices</li> </ul>
SIBCAFI	<ul style="list-style-type: none"> <li>• Clarify ko lang po, di naman tayo resolving issues, magbibigay lang input gaya ng fast turn over ng tenure... going on ang lahat ng problem pero hindi na sila kumikilos especially kapag palapit na eleksyon.</li> <li>• In terms of education, non conventional way, dapat itranslate what really matters to the LGUs; LGUs dapat mag initiate ng educational programs, magementrol ka pwede 2 units 3 units</li> <li>• Tapos ang mga program ng barangays dapat i-publish bago mag eleksyon</li> </ul>
Climate Change Commission	<ul style="list-style-type: none"> <li>• Nairaise na marami policies at marami tao</li> <li>• Question lang, is there a disconnect between national and local govt?</li> </ul>
HLURB	<p>Minsan ang National Govt wala sinusunod na implementing rules, what is the extent of implementation? Extent of power? While we have national policy dapat may implementing rules and regulations, madaling sumunod pag may sinusundan ka... important na may susundan...</p>

LLDA	LLDA is the primary agency to manage the LDB –lead in the management and environmental protection in the Region
NHA	<ul style="list-style-type: none"> <li>• As far as NHA is concerned, our mandate is to provide settlements, but the responsibility of all these things, clearing etc. are LGUs</li> <li>• Bago po tayo lumayo sa usapan natin, pag-usapan muna natin ang shoreland areas below 12.5 m easement.. sinu po inaabot nito?</li> </ul>
LLDA	<ul style="list-style-type: none"> <li>• In layman’s term, dalawa kasi yung lake levels, pag summer kapantay nila ang mean sea level, ang kapantay po noon e 10.50m sa elevation; kapag high tide, ang 12.5 m. elevation ang kapantay non. Sa lumang mapa, ang extent po ng LDB ay 2 m. above mean sea level o 12.5m po na maximum lake level.</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>• Actually meron po tayo isa kaso exactly Laguna Lake ang issue, more specifically yung highest water line, eto po yong Del Rio case... nakalagay duon, the highest water line, what is the extent of the private property... maganda ito na nasasbi ngayon that there is already an exact measure, kasi meron pa 3m easement dahil yon ay kasama sa public domain</li> <li>• There should be coordination with LLDA on ISF</li> </ul>
WWF	<ul style="list-style-type: none"> <li>• Subject of flooding, isa sa recommendation sa LGU ay maglagay ng flood zone, dapat kasi hindi irerelocate ang mga tao sa floodzone... natitirhan pa, pero kelangan gawan ng paraan para mga toilet and electricl dapat nakataas...</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>• We are enhancing the , dapat sa floodzone, dapat iaalis na ang constituents, because that is not fit for settlement... kasama ang DRRM sa CLUP... ok you can allow them to stay however come up with a program where it will be better for them ...</li> </ul>
WWF	<ul style="list-style-type: none"> <li>• What is an acceptable floodzone? Acceptable risk? How can you define the floodzone</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>• Resilience of the people; how resilient is your people? Cost and benefit analysis where we can protect lives and property</li> </ul>
LGU Binangonan	<ul style="list-style-type: none"> <li>• Meron ginagawa na local shelter plan; integrated sa DRRM and identification ng relocation site..</li> </ul>

CCC	<ul style="list-style-type: none"> <li>The Commission doesn't have specific interventions in Laguna Lake, but in Marikina area, one of the outputs is to provide technical assistance, to come up with a plan, sustainable development, kaya tinitingnan natin yung mga climate projections sa mga plan ng LGUs.</li> </ul>
WWF	<ul style="list-style-type: none"> <li>WWF for the past 5 years, governance in 1st and 2nd districts of Laguna... lahat nakadepende sa groundwater, oversold na ang permit from NWRB... hindi kasya ang binibigay ng ground water, since nang issue ng rights e vegetation pa ang land scape, hindi na ganun ang pag sipsip sa groundwater... NWRB may mandato , bakit hindi nalang gawan ng MOA ang LGUs at NWRB, hindi lang quantity pati quality... nakita namin yon sa WQMA, nagawa sa Sta Rosa watershed... nagpropose kami ng drainage masterplan, gusto ng Sta Rosa pero Cabuyao ayaw kaya nag solo ang Sta Rosa... ulan ay galing upstream sa Silang, sinu ang magmamanage noon? Given a local governance</li> </ul>
SICAFI	<ul style="list-style-type: none"> <li>Under the river rehab program, sagip ilog is one... it came into being because of this... it enables us to do CSR projects, but isa sa mga proyekto yung need, concern ni sir ED, ang solution namin dun maybe we can work out an enabler... enabling policy about the transboundary arrangements among local governments... kelangan natin gawin yon kung tayo ay magkakatabi... to consider transboundary issues, isa sa benefit ay halimbawa magsalo-salo sa landfill... o facility common to every one..</li> </ul>
<b>QUESTION 3</b>	
HLURB	<ul style="list-style-type: none"> <li>Over use na ang Lake, eyesore na nag fishpen... I ed all the churches... makikita mo parang sobra sobra na ata ang fishpens... regulate the introduction of fish pens... ung mga artificial feeds hindi naman lahat nakakain, We saw that indeed that the Lake is dying due to the fish pens.. I think it is a challenge to LLDA how to regulate the introduction of Fish pens...</li> </ul>
LLDA	<ul style="list-style-type: none"> <li>Actually may approved na ZOMAP, 10,000 hectares for fishpens and 5000 hectares for fishcages, nagkaproblema sa fish pen, pero naregulate na natin. Ang malaki problem ay sa fish cages, may moratorium sa permit sa cages, pero may nakukuha sa LGU...</li> </ul>

NHA	<ul style="list-style-type: none"> <li>Lack of implementation, according to the laws, you are the one who should be issuing the permit. How are you allowing LGU to issue permit?</li> </ul>
LGU	<ul style="list-style-type: none"> <li>Ang sa amin lamang po e, nirerequire namin ng business permit, hindi kame ng nagbibigay ng fishpen permits... bago kami magbigay kami ng business permit dapat may LLDA permit... dapat magsimula sa inyo (LLDA)</li> </ul>
LLDA	<ul style="list-style-type: none"> <li>Etong pinanalo ng LLDA vs LGUs, landmark decision ng Supreme Court, na ang Lake is a unique ecosystem, any development within one area affects the ecosystem. Ang LGUs ang alam yung law nila...</li> </ul>
	<ul style="list-style-type: none"> <li>Meron pagkakaiba ang LLDA ZOMAP compared sa fisheries code. Ang ZOMAP was implemented in 1996... nagsisimula sa pag-identify ng illegal fishpen structures, with what is required by the fisheries code...</li> </ul>
---	<ul style="list-style-type: none"> <li>May illegal fish pens in Talim Island more than 50K hectares;</li> <li>Bakit maliliit lang ang i-de-demolish?</li> </ul>
HLURB	<ul style="list-style-type: none"> <li>Mercury content in the lake; My co teacher in Magsaysay developed a sickness, cancer... because of his stay in the fish pen...</li> <li>Must be a way of valuing each and every contribution of every municipality</li> </ul>
LLDA	<ul style="list-style-type: none"> <li>May on-going study about the environmental health, relationship between environment and health...</li> </ul>
<b>QUESTION 4</b>	
WWF	<ul style="list-style-type: none"> <li>The purpose of WAVES is to manage the Environmental Cost... there is no disincentive to change land to impermeable surfaces... this results to ground water scarcity, loss of photosensitivity... how can ecosystem accounting drive mayors to think collectively, and how this collective actions would benefit all concerns</li> <li>So perhaps they will be made to contribute... naiingit yung Silang sa Sta Rosa, it was brought up during a workshop... since agriculture revenue is much smaller compared to urban areas...</li> </ul>
LGU-Binangonan	<ul style="list-style-type: none"> <li>Approval of land use plan, kasama ang HLURB, dapat doon palang sa approval, magkaron ng strict scrutiny, sa tingin hindi tama ang evaluation</li> </ul>

	sa local level, ibalik sa LGU, hindi na gagawin sa susunod...
CCC	<ul style="list-style-type: none"> <li>• Where will liability lies?; Impact of climate change—How much will be lost?</li> </ul>
<b>QUESTION 5</b>	
NHA	<ul style="list-style-type: none"> <li>• Ang kelangan ay provision na may accurate date, because there are conflicting data... how much mercury content do we have? With proper research, it can constitute an accurate information for a better discision making...</li> </ul>
SIBCAFI	<ul style="list-style-type: none"> <li>• Among the groups, SIBCAFI is a product of LLDA River Rehab Program. In fact yung mandate namin is very much aligned with LLDA, dito sa no.5, what goals do you have to engage river councils over the long term? We have a unique goal or mission, we engage stakeholders</li> </ul>
WWF	<ul style="list-style-type: none"> <li>• Implement Clean Water Act for Laguna Lake basin... set target for different river systems, you cannot manage the lake without managing the rivers...</li> </ul>
NHA	<ul style="list-style-type: none"> <li>• I would like to go back to our mandate in NHA, encroachment of informal settlers in lakeshore... no.a of families, when do you have this area cleared – timeline? sources of budget?</li> </ul>
LGU-Binangonan	<ul style="list-style-type: none"> <li>• Hygienic and unhygienic, Inventories of informal settlers in danger zone, responsible to collate this information... masosolve ang data gathering, ready na.. ongoing ang inventory...</li> </ul>
WWF	<ul style="list-style-type: none"> <li>• Kelangan ang supreme court ruling</li> </ul>

### Members of the LGU Breakout Group

1. Segayo, Maria Lovella CCC-CCO
2. Maligalig, Susan President-SIBCAFI
3. Macalincag, Joel D. NHA
4. Tongson, Ed WWF
5. Arceo, Carmelo NHA-Binan
6. Dizon, Jenica OPAEP
7. Tolentino, Petronino LGU-Binangonan
8. Atty. Linda Malinab-Horuilla HLURB
9. Quintos, Cesar LLDA
10. Hernandez, Emil LLDA
11. Soriano, Marian LLDA
