

# Where are the accounts making a difference / What is new in **Canada**?

1. Trade negotiations: Energy, water and GHG intensities were used in negotiations with the EU
2. Policy making: Physical flow accounts serve as inputs to analysis and modeling work by policy departments
3. National accounting: Natural resource stock accounts are integrated with the Canadian national balance sheet
4. Education sector: Measuring the state and tracking changes in the environment

## What is new?

1. Measuring Ecosystem Goods and Services (MEGS)
2. Expanding the accounts to include criteria air contaminants
3. Natural resource wealth by sector will be added to the quarterly national balance sheet
