SEEA EA Implementation Strategy and ARIES for SEEA

Bram Edens, PhD

Senior statistician, Environmental-Economic Accounts Section

United Nations Statistics Division

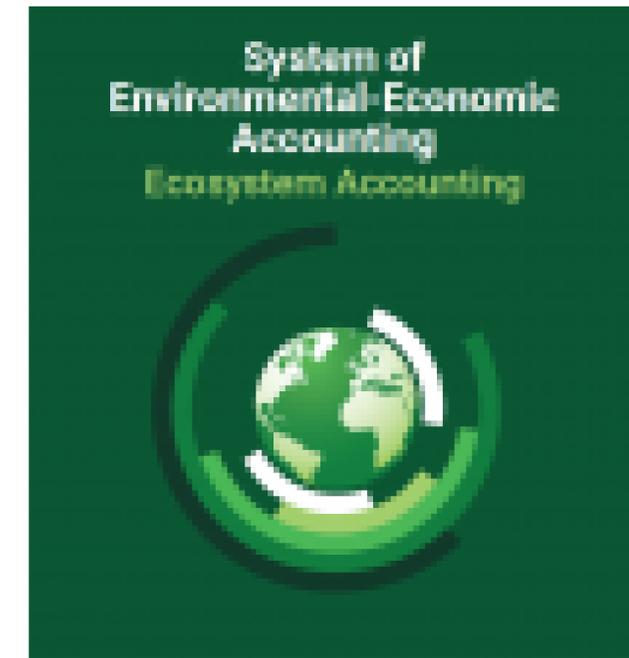

United Nations

SEEA EA adoption

- The SEEA EA was adopted at its 52nd session of the UN Statistical Commission in March 2021

“a historic step towards transforming the way how we view and value nature” – Antonio Guterres, UN Secretary General

- UN Common Agenda underscores:
 - > “now is the time to correct a glaring blind spot in how we measure economic prosperity and progress” and “new measures to complement GDP”
 - > Urges Member States and others to begin implementation of the System of Environmental-Economic Accounting (SEEA) Ecosystem Accounting
- SEEA EA Implementation strategy adopted in 2022

SEEA EA Implementation Strategy

UN CLIMATE
CHANGE
CONFERENCE
UK 2021

IN PARTNERSHIP WITH ITALY

Overall objective: scale up the uptake of the SEEA Ecosystem Accounting

Suggested target: at least 60 countries implement at least one account of the SEEA EA by 2025

Specific objectives:

- Regular production of selected ecosystem accounts, starting from ecosystem extent accounts to ecosystem condition and ecosystem services in physical and monetary terms;
- Mainstreaming biodiversity and ecosystems into (sub)national policies;
- Use of the SEEA EA for monitoring and reporting in particular
 - > In National Biodiversity Strategies and Action Plans (NBSAPs),
 - > Voluntary National Reports that present country progress towards achieving the SDGs,
 - > National Determined Contributions (NDCs) that present country progress towards climate targets and highlight the government actions and policies to combat climate change;
- Dissemination of ecosystem accounts through global data sets

GOALS**

Approach and main principles

Activities in support of the implementation

ARIES for SEEA

- How?
 - > Developed as part of NCAVES project (EU funded; UNSD and UNEP) by BC3 building on existing ARIES platform
 - > Linked to UN Global Platform on Big Data for Official Statistics
- Beta version launched in April 2021 – continuously expanded
- Why?
 - > Need for a computational platform
 - > Lowering barriers to compiling ecosystem accounts for countries
 - > Make it easier to collaborate (share data and develop models)
 - > Facilitate deriving indicators (using solid basis in accounts)
