

2nd NCA Policy Forum, 22-23 November 2017

Session 6 NCA for government processed?

Wealth Accounting and the Valuation of Ecosystem Services
www.wavespartnership.org

Session 6 aims and content

The aim is to explore how NCA can be used in government process.

Content 4 x 10 minute presentations + questions

- Botswana – water and sustainable development
- Indonesia – national development plan
- Rwanda – Mid-tem national strategy
- Australia – strategy and action plan for NCA

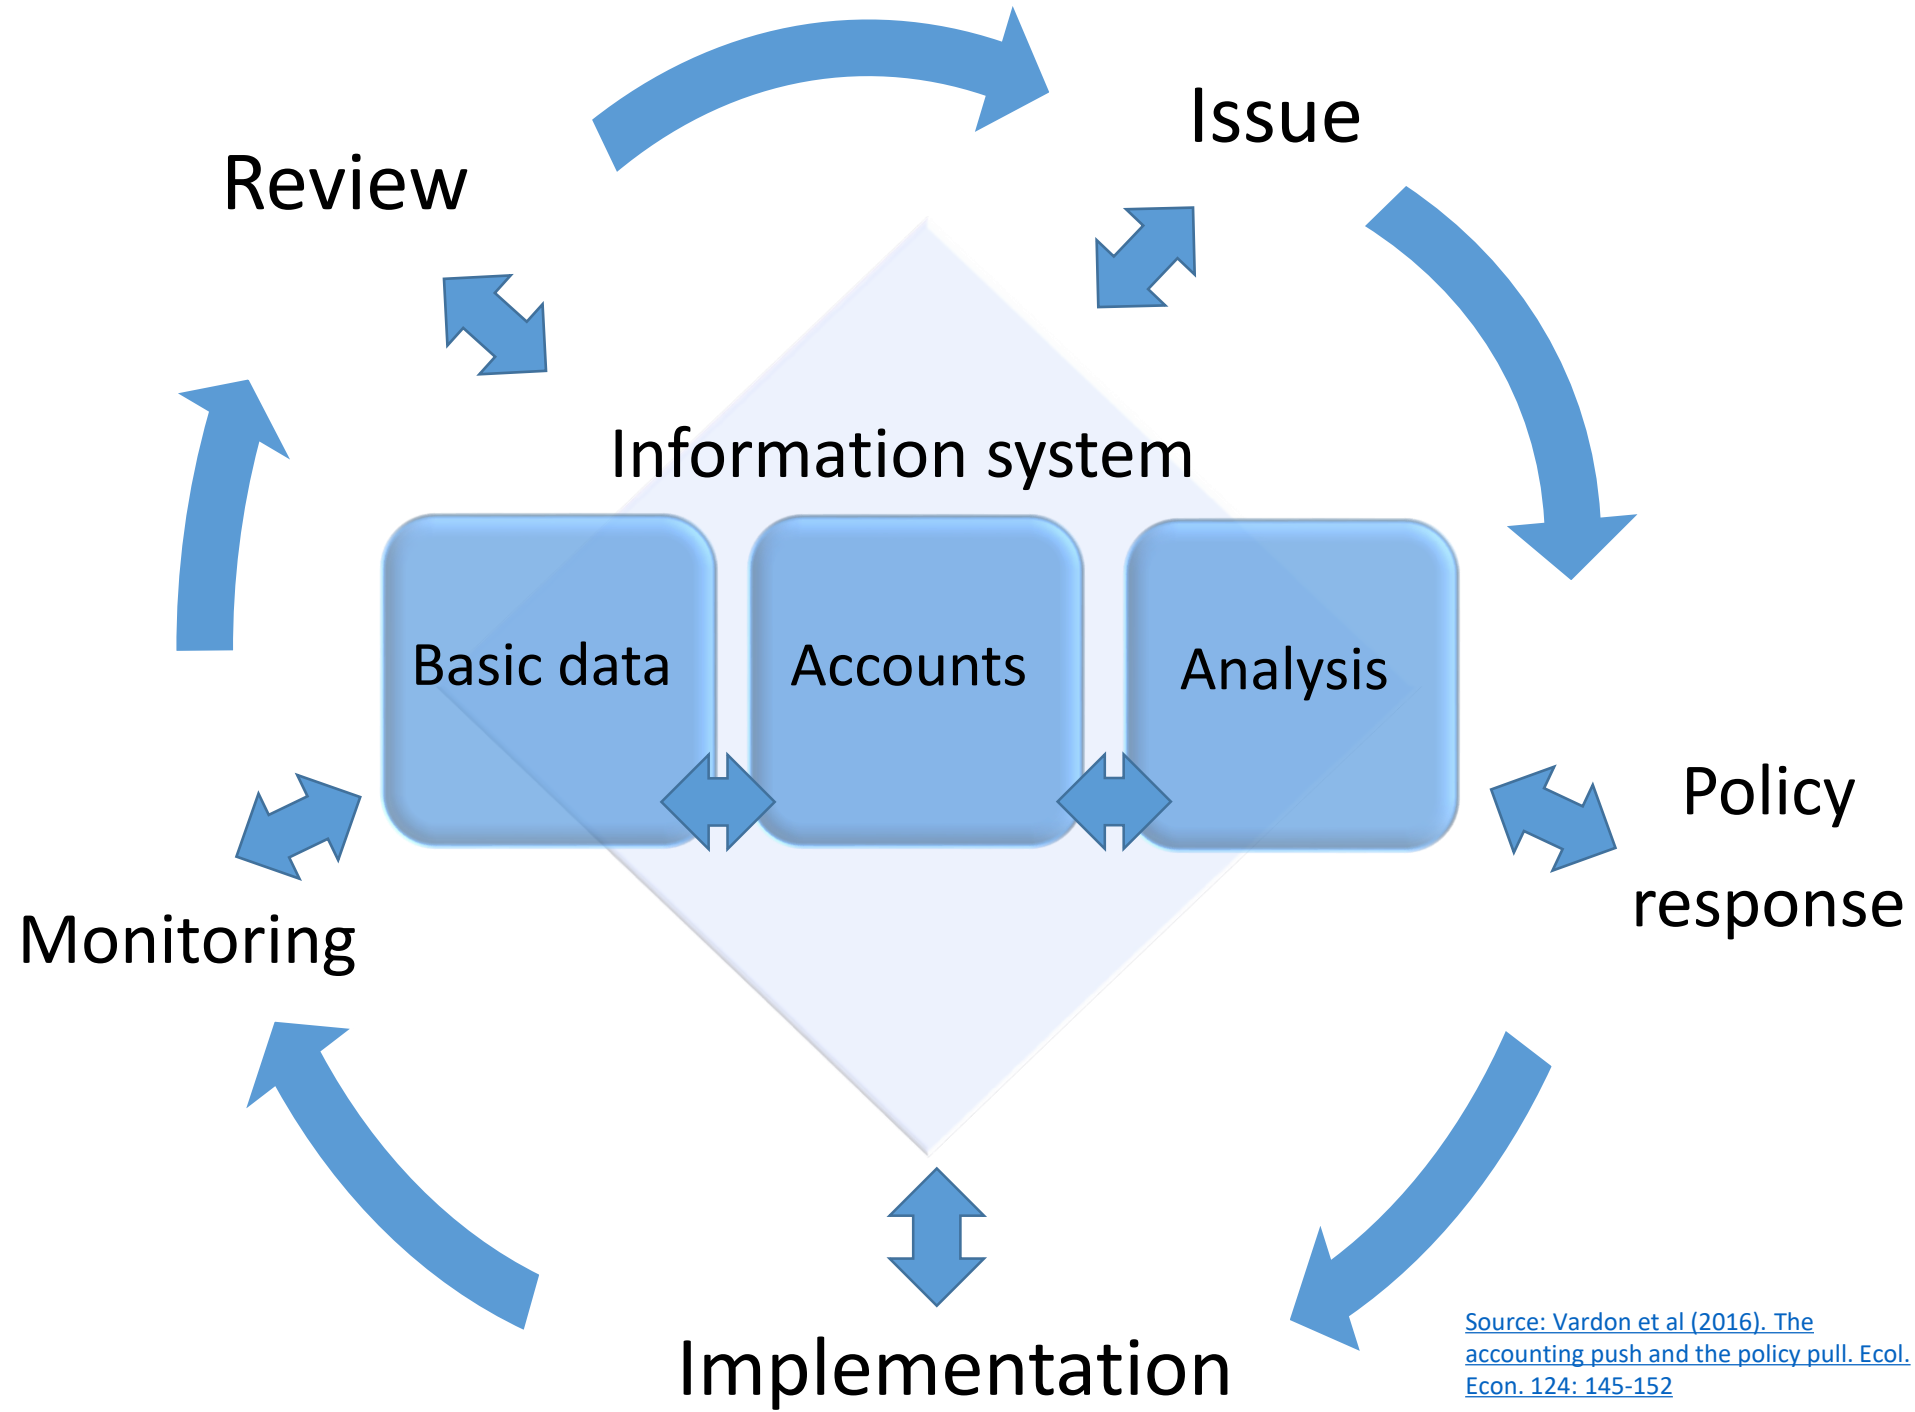

Table discussions

Contributed papers

- Research-practice co-creation as a strategy to foster use of natural capital accounting at the national level: practical reflections from the Pacific (Pierre Bertrand, Gilles Dubochet, Francesco Obino)
- SDG 13, the SEEA and New Zealand's missing carbon tax (Jeremy Webb)
- Natural Capital Accounting for State of the Environment Reporting in the Australian Capital Territory: A Proof of Concept (David Summers, Becky Smith, Kate Auty, Michael Vardon)
- Ecosystem Accounting in Water and Biodiversity Policies: Experience from a Pilot Project in Peru (Rosimeiry Portela, Mahbubul Alam, Claudio Schneider, Daniel Juhn)

Questions for discussion

1. How is NCA for national development planning organized institutionally? Which agency takes the lead, how is leadership accepted, how is cooperation stimulated, how is data shared?
2. How is monitoring progress of the national development plans organized, what is the role of NCA and how can it be strengthened?
3. National development plans involve new policy and investments. Is NCA used for this, for what purpose, and how can its role be strengthened?
