

The UK (NCC) Perspective

It's early days, but we are ambitious...

Background

- National NCA is being taken forward in the UK by the the national statistics office and the environment ministry, supported by the NCC.

NCC leading the debate

- The NCC is influencing the debate on NCA, by making the case for it to ministers and beyond:
 - State of Natural Capital Report;
 - Generating mainstream media interest.
- Going beyond national NCA – corporate NCA .

Way ahead

- The national statistics office and environment ministry produced a roadmap to NCA in December 2012.
- This sets out a path to including natural capital in the UK's environmental accounts by 2020, with the work plan frontloaded.

Now it's time to collectively deliver...
