Colombia
What has been the most important?

- Work plan
- Periodical reviews and meetings
- Results compilation
- Progress development
- Important commitment

The greatest challenge ... articulate in an ordered way our institutions
In Colombia, water resources and forests are priorities.

Colombia has annual water resources of approximately 2,265 Km³ and a caudal of 71,800 m³/s.

53% of the territory has forest natural cover.
