WAVES Policy Session Exercise

• Join a table with a theme that is interesting for you or your country’s priorities
• Work together to suggest how to make use of natural capital accounts to identify a government policy action/strategy to address issues within this theme
• Think through the trade offs these actions would have on other sectors and how this can be explored using accounts
• Identify ideas, issues or gaps in analysis that would be needed to support your action/strategy or deal with the trade offs
